

anywhere • reliable • secure • cloud

Today's employees expect the ability to utilise their IT assets from anywhere, 24x7. The challenge is to ensure that these assets are *securely* and *seamlessly* managed so that your business can focus on what it does best, whether that be in the office, on the road, at a client's site, or at home.

imagine the cost benefits of removing the need to house and manage your own infrastructure to support your Windows® assets. *imagine* having a consulting service that grows and moves with your business as you need it. *imagine* no more. Contact the end-user management experts at impeltec™ to make your always-on environment a reality with Windows Intune™.

features

Simplicity: impeltec experts will work through all your requirements to get your business up and running and securely managed with Windows Intune™.

Anywhere, Anytime: remote management and security of your end-user assets, including Windows® and mobile devices, in any location over the internet. Deploy software and Windows® patches with ease, and remotely support your mobile workforce when and where they need it.

Cloud infrastructure: Windows Intune™ is hosted by Microsoft® allowing you to remove the large expense and the technical pain of purchasing, housing and managing your own infrastructure.

Protection: enterprise-class virus and malware protection is built into the service providing you with a central management point to protect your assets.

what do I get?

Analysis: impeltec experts will work with you to understand your business needs, and design the service to make sure you are getting full value for money.

Windows Intune™: we will coordinate the subscription and setup process, and provide expert consultants to bring your corporate and BYOD assets under management.

Peace of mind: remove the hassle of maintaining Windows® licensing. Your Windows Intune™ subscription will provide you with upgrade rights for Windows® 7 Enterprise along with free upgrade protection for future Windows® versions.

Predictable budgets: streamlined monthly payment cycles. Since the infrastructure is hosted by Microsoft®, you are removing a large risk component from your IT budget.

is it for me?

- Does your business currently have no, limited, or out-dated, end-user management infrastructure, or no virus and malware solution?
- Is the cost of efficiently managing your end-user assets a strain on your resources and budget?
- Are your IT assets in dispersed locations making your management of them a costly challenge?
- Are you looking to limit or reduce your on-premise IT support overheads?
- Are you looking for a way to easily manage employees' BYODs (Bring Your Own Devices)?
