

Autopilot Overview

Managing a corporate Windows build can be time consuming and inefficient. When you purchase new devices, what if you could transform your existing Windows 10 installation into a “business-ready” state?

imagine unboxing your new device and automatically configuring it from the cloud, without the need to reimage.

imagine no more. Windows Autopilot provides setup and pre-configuration services for new devices, so they're ready for productive use right out of the box.

Features

Business-ready: unbox your new Windows device and turn it on. Autopilot configures it from the cloud - with a few simple clicks, the device becomes business-ready.

Fast provisioning: deliver a better user experience with personalization and fewer steps to set up.

Factory direct: your hardware vendor can ship the device to your employee.

Cloud-centric: automatically join devices to Azure Active Directory and enroll them in mobile device management.

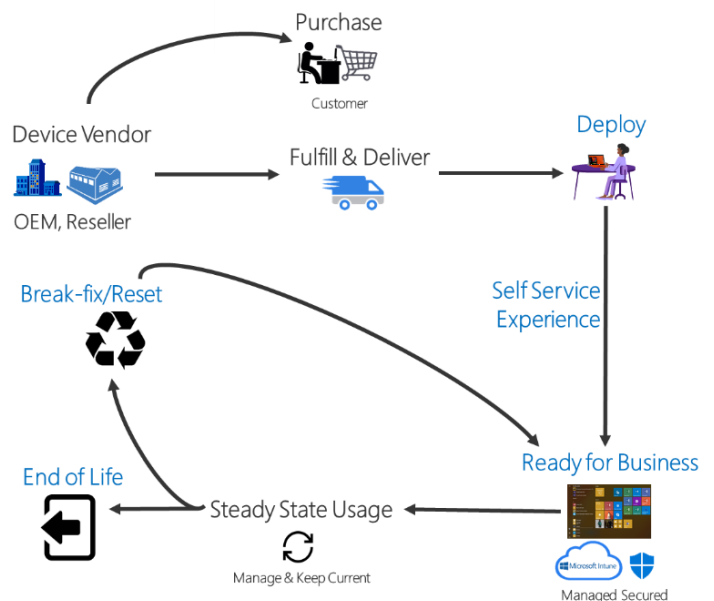

Monitor: users and IT staff can easily see how configuration is progressing.

What do I get?

Analysis: impeltec experts will work with you to understand your business needs and design the service to make sure you are getting full value for money.

White glove deployment: impeltec can help you pre-provision Windows 10 devices to be fully configured and business-ready for your organization or a user.

Ease of use: impeltec will help you remove the hassle of maintaining on-premises infrastructure to create or deploy your custom Windows build.

Modern desktop: Deploy the latest version of Windows 10, and ensure your devices are up-to-date with applications, policies and settings.

Is it for me?

- Is rebuilding devices to adhere to your corporate standards time-consuming or non-existent?
- Do you want to deploy a new device to a user straight out-of-the-box without the need to pre-configure it?
- Are your users in dispersed locations making setup a costly challenge?
- Do you want to bring your OEM Windows devices under control?

Details

Windows Autopilot is a collection of technologies used to set up and pre-configure new devices, getting them ready for productive use. It can also be used to reset, repurpose and recover devices. impeltec can help you simplify all parts of the lifecycle of Windows devices, for both IT and end users, from initial deployment through the eventual end of life.

impeltec info

impeltec focuses on offering Windows®-based SOE (Standard Operating Environment) build services for end-user computing, as well as complementary services such as application packaging, deployment consulting, and systems management. We have a strong focus on the cloud, with extensive experience and expertise in Microsoft Azure™, Office 365™ and Microsoft Intune™.
